

Environmental responsibility.

ACCESS ROAD REHABILITATION

In 2022, nearly 2 km of access roads were rehabilitated, benefiting the surrounding communities.

EROSION CONTROL

Erosion control works are being carried out and maintained in the areas surrounding the Gasoducto Morelos right-of-way.

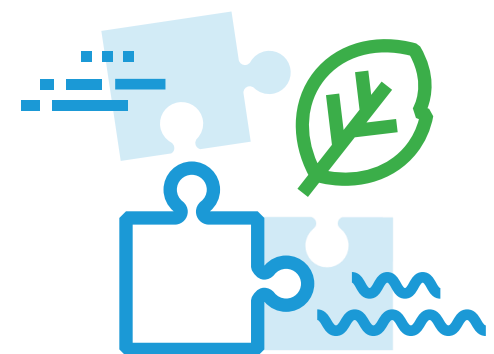

AFFLUENT BANK PROTECTION

GDM monitors and maintains the rockfill works on the banks of the affluents crossed by the project.

Environment Care & Protection

During its development and operation, the Gas Natural Morelos Transportation System has focused its efforts on the care and protection of the environment in such a way that it carries out and maintains works that mitigate the environmental impact that could be generated by GDM's activities.

Let's take care of our environment!
