

Physical Security Pillars.

Who does it apply to?

To the staff of Gasoducto de Morelos.

Transmission of a balanced profile

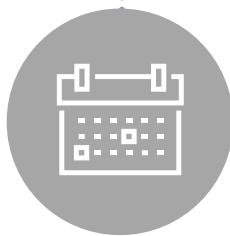

(Project a low profile to the population, and at the same time be identifiable as "not involved")

This is manifested, for example, in the neutral attitude and initial appearance, and in having credible identification elements.

Evasion

Act discreetly, restrict information about operations and activities to any outsiders, and change routine as much as possible.

Control

Adequate planning, constant and available communication and monitoring of operations.

Knowledge and optimal preparation

Having the relevant equipment in good condition, prior knowledge of the operating environment, and relevant knowledge of the correct actions to prevent and react to common threats.

Everyone (managers, staff and contractors) **must be involved in safety** (in control as well as in the implementation of standards and rules).
